RokIntroScroller is a mootools based module that scrolls your articles in a horizontal manner. The module works by loading articles from designated categories/sections inside the styled, javascript effect.

RokIntroScroller can be downloaded along with the other bundled extensions in the **infuse-extensions-j15.zip** archive

Below is a screenshot of the parameters that are available for RokIntroScroller and are the settings chosen for this demo:-

Below is an example of the code used for the demo, for the content articles:-

```
<div class="scroll-img">  </div>
```
