This guide covers the basics of installing a template.

Video Tutorial Currently Available! [Launch the Joomla Template Installation Video Tutorial now!](#)

Downloading the necessary files

To install the template, you only need one file:-

- **Infuse Template** *rt_infuse_j15.tgz* - This is the template file that you use to install into Joomla.

There are other files that you may wish to download that accompany the release, but are not required for the template to work.

- **Infuse Source PNG(s)** *infuse-sources.zip* - This contains all the Adobe Fireworks PNG source files for the template, and if applicable, the logo font.

- **Infuse Extensions** *infuse-extensions-j15.zip* - This package contains all the extensions that accompany the template release.

- **Infuse RocketLauncher** *Joomla_RT_Infuse_j15.zip* - The RocketLauncher pack is a full Joomla install that contains all the demo content, including extensions and the template.

The latest extensions can be downloaded from the Extensions Download area located [here](#)

Step 1

- Using the Joomla installer

- Login into the Joomla administrator (<http://yoursite.com/administrator>)
- Go to **Extensions** ▢ **Install/Uninstall**
- Select the browse button and find **rt_infuse_j15.tgz**
- Click **Upload & Install**

The template is now installed.

Step 2 - Making Infuse Default

Installation

Written by Administrator

Tuesday, 22 September 2009 14:30 - Last Updated Wednesday, 30 September 2009 14:49

- Login into the Joomla administrator (<http://yoursite.com/administrator>)
- Go to **Extensions** ▢ **Template Manager**
- Find **rt_infuse_j15.tgz**
- Select the radio icon to its left
- Click **Default** in the top right button menu

The template is now default and will appear as your site theme.
